# Kardia 12L. The easiest way to acquire a 12-lead ECG.

Making critical data accessible  
in more places, more often.

## What is Kardia 12L?

It's a highly portable FDA 510(k) cleared and CDSCO approved 12-lead resting ECG device with simplified lead set technology and a **unique single-cable design**.

Kardia 12L is intended for use with patients 18 and up, for use by healthcare professionals, or trained personnel in healthcare facilities and in acute settings.

## Advanced AI for cardiology.

AI trained and validated with 1.75M ECGs from leading U.S. medical centers.<sup>1</sup>

1M

ECGs  
for training

750K

ECGs  
for validation

FDA clearance for ECG algorithm\* based on substantial equivalence to 12SL algorithm. (GE HealthCare)

8

Standard diagnostic-bandwidth leads  
(4 recorded + 4 derived)

4

Synthesized leads  
(using machine learning)

\*Refers to the cardiac determinations provided by the Kardia 12L system

## The modern way to capture critical heart data.

The 12-lead ECG experience just got easier. Now you can capture accurate heart data with a degree of simplicity never before seen in a 12-lead system.

### Portable

Kardia 12L is battery-operated. And weighing in at just 135.6gm (approx), it fits easily in your lab coat pocket.

### Clinically Efficient

Even healthcare professionals with infrequent ECG experience can acquire an accurate ECG in minutes.

### Easy to Use

With a simple five-electrode setup and no wires to detangle, Kardia 12L is intuitive and less error-prone.
